TESTED • INSPECTED • CERTIFIED

SINGAPORE TEST LAB

Singapore Test Lab (STL) provides a suite of independent third-party testing and technical capabilities.

Tests performed by STL are in-line with the latest international benchmark of ISO/IEC 17025 which attests to STL's technical competency in laboratory testing. For specialised products, or products which are uncommon, STL's highly regarded and experienced team will develop testing methods which are suited for the specific purpose.

ENSURING PERSONAL PROTECTIVE EQUIPEMENT (PPE) SAFETY

Personal Protective Equipment (PPE) is a requirement at all construction, shipbuilding, and worksites. Equipment such as safety helmets, safety boots and fall arrest harnesses are a must not only in protecting the workers who use them, they are also mandatory in accordance with various rules, law and code of practices.

With our own drop tower and other testing jigs and fixtures, we have the capability to test various functions required of a fall arrest harness as well as the many other required tests as stipulated for safety helmet or safety boots.
