

## STL Chemical Laboratories are ISO/IEC 17025 Accredited

Singapore Test Lab is proud to announce that our chemical laboratories are now **accredited to ISO/IEC 17025**. This accreditation reflects our ongoing commitment to quality, reliability, and the delivery of accurate, and dependable results. It demonstrates that our laboratory operates at the highest levels of technical competence, giving our clients confidence in every test we perform.

SINGAPORE LABORATORY ACCREDITATION SCHEME		
<b>Schedule</b>		
Singapore Test Lab Pte Ltd 100 Enterprise Road Singapore 629829		Certificate No. : LA-2026-0900-A Issue No. : 1 Date : 16 March 2026 Expiry of Certificate : 15 March 2030 Page : 1 of 4
FIELD OF TESTING: Chemical and Biological Testing		
ITEMS / MATERIALS / PRODUCTS TESTED	TESTS / PROPERTIES	STANDARD METHODS / TECHNIQUES / EQUIPMENT

We provide comprehensive testing services across a broad spectrum of chemical and water-related analyses. This includes **potable water quality testing** such as BS 6920 and SS 375 ensuring that materials in contact with drinking water do not adversely affect its safety, taste, or appearance. We also provide **lead content testing** in compliance with NSF 372, helping manufacturers meet regulatory requirements for low-lead components in water systems.

The achievement is led by our **Head of Chemistry, Dr. Chen Huayi**, who brings over 30 years of extensive industry experience to the team. Dr. Chen has built a distinguished career working with globally recognized organizations such as TÜV SÜD and Intertek Testing Services.

Beyond his technical expertise, he actively contributes to various standards working groups, helping shape and advance national standards. His leadership ensures that Singapore Test Lab not only meets regulatory and quality requirements but also stays at the forefront of best practices and emerging testing methodologies.

Our chemical laboratories are equipped with **state-of-the-art analytical instruments**, to provide high precision, sensitivity, and reliability across a wide range of tests. These include Ultrapure filtration system with osmosis system, Inductively Coupled Plasmas Optical Emission Spectroscopy, and Gas Chromatography Mass Spectrometry, which allow our team to conduct rigorous chemical analyses with confidence.

Supported by a team of highly skilled and dedicated chemists, we are able to deliver results that are not only accurate but also consistent and repeatable — giving our clients the confidence that their materials, products, and water systems meet the highest standards of safety and performance.

At Singapore Test Lab, ISO/IEC 17025 accreditation is more than a certification — it is a reflection of our culture of reliability and customer centric testing solutions, empowering our clients and their business to succeed with confident
